

Why does it seem like the US Government is taking away forms of entertainment from the general public? This FCC indecency ban is totally obnoxious. There are people in this world who find that form of entertainment amusing, and I myself am one of them. It should be OUR choice, not the choice of our government or some high and mighty to decide what we should listen to! We have the power to change the channel if WE don't like it.

I for one would dedicate the world to one particular radio show, The Monsters of the MIdday on WTKS in Orlando, FL. I had been listening to them for 5 years before I moved here to Virginia, and now I hear that they might be cancelled and taken off the air due to this ban that is now in effect. That show changed my life and the life of many others. My life has become more enriched and I have learned some valuable lessons in life due to that show, because it was my choice.

You people should really listen to the voice of the people who support shows like this, and not the people who hate it. Personally they don't like it because it is vulgar and non-appropriate to THEM, but if we took away everything in life that was non-appropriate to someone who didn't like it, what would we have left, a boring world and more crowded prisons and hospitals from people going crazy!
